DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-9 and 17-24 are drawn to a method for seeding a pseudo-random number generator, classified in class 380, subclass 44.

II. Claims 10-16 are drawn to a method of encrypting a message for secure transmission, classified in class 380, subclass 28.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility because it can be used for the transmission of any type of data, not necessarily the random seed of invention I.

I. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
